PROFESSIONAL SUMMARY

Product-minded software engineer with 6+ years of enterprise-scale frontend architecture experience at BlackRock, specializing in Angular, React, TypeScript, and Micro Frontends (MFEs). Full-stack mobile and web expertise spanning iOS (Swift), React Native, Flutter, and backend technologies. Proven track record of system design, technical mentorship, cross-platform development, and delivering high-impact solutions in complex fintech environments.

TECHNICAL SKILLS

Frontend: Angular, React, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Micro Frontends (MFEs), WebSocket, Frontend Architecture, System Design

Mobile: iOS (Swift, native development, App Store publishing), React Native, Flutter (Android and iOS)

Backend & DevOps: Java, Node.js, Git, Docker, AWS (EC2, S3, CloudFront), CI/CD, Webpack, Agile/Scrum

Core Practices: System Architecture, Test-Driven Development (TDD), Performance Optimization, Cross-platform Development, Technical Leadership, Mentorship, AI-assisted Engineering

WORK EXPERIENCE

BlackRock

New York City, NY

Associate Software Engineer, Portfolio Management Technology

Jan 2023 – Present

- Led Micro Frontends (MFE) expansion initiative, delivering 4-5 production MFEs from 6 prototypes, coaching 5+ teams on architecture patterns and design system improvements across PME division
- Executed enterprise cloud migration for PME division as first to go-live with 0 incidents, coordinating 5 dry runs and managing seamless production deployment across portfolio management teams
- Championed AI-assisted engineering culture through hands-on Copilot coaching and technical mentorship, reducing development overhead by 60% and establishing best practices across PME organization
- Drove 1+ minute latency reduction in AMPs connection by pioneering WebSocket integration and leading cross-team performance testing, diagnosing and resolving 7-8 critical production errors
- Spearheaded organizational initiatives including ONE ITE Committee (mentorship program, technical newsletter, team representation) and global ITE All-Hands coordination (200+ participants), driving engineering culture and cross-functional collaboration

Software Engineer, Analyst Rotation Program

Aug 2020 – Dec 2022

- Designed comprehensive component design system with reusable UI patterns and shared libraries, reducing development time by 30% and standardizing frontend architecture practices across teams
- Architected and shipped notification microservice with full frontend integration, improving client engagement by 100% and enabling real-time alerting and system monitoring at scale

Hofstra University

Hempstead, NY

Lead Researcher, Hofstra Research Lab

May 2018 – Dec 2020

- Led research team of 5 engineers through full product lifecycle from conception to deployment, managing technical architecture decisions, cross-team coordination, and system design for high-performance computing projects

EDUCATION

Hofstra University

Hempstead, NY

M.S. Computer Science

May 2020

B.S. Computer Science

Dec 2019
